

VERNISSAGE: PACO VALLEJO | SÍNTESIS PLANETARIA - CRAFTING A WORLDVIEW | BERLIN ART WEEK 2017

THURSDAY 14 SEPTEMBER 2017 AT 19:00H - FRIDAY 15 SEPTEMBER 2017 AT 01:00H

EMSERSTRASSE 124 BERLIN 12051

The ingenious form and unique character of the artworks by Paco Vallejo are based on the emphasis of craft in their creation: knots, weaving, bundles and twists. With cross-references to Analytical Cubism, the realization of a form is always bound to its simultaneously division. It is already split into several perspectives within every single view.

The power and debility of a shape is realized on the side of the viewer as well as in the structure of the artwork. Overall this play of perspective, surface, and space make that the implied ball becomes a globe, and then a world, and thereby representation, construction, and concept coincide with one another. In interaction with Vallejo's art one could think of these moments as interdependent parts of a single process: an attempt to see the world which always implies active engagement.
